Garrett MT-5500 – Multi-Dimensional

~~\$4,994.95~~ **\$3,294.67**

Garrett MT 5500 Weather-resistant Multi-Dimensional Metal Detector with Automatic Self-Diagnostics

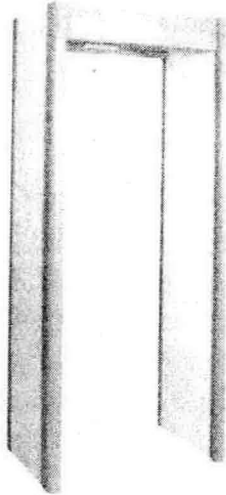

Safety concerns can take a back seat when Garret MT 5500 walk-through metal detectors are the backbone of your security network. An extremely perceptive detection field analyzes from multiple dimensions, pinpointing the precise location of targets in the archway. Intelligent design with tamper-free and weatherproof qualities ensures that this versatile system offers consistently sensitive performance in any security application.

Details SKUs

Magnascanner MT 5500 Walk-Through Metal Detector

The Garrett MT 5500 metal detector provides maximum throughput with multi-dimensional scanning.

Easy Assembly

The MT 5500 metal detector is easily assembled with only 4 pieces and 8 screws.

Multi-Dimensional Scanning

Features multi-dimensional scanning which ensures maximum throughput and uniform screening with a minimum of false alarms. Multiple coil circuitry with dual alarm lights inform operators on which side of the detector the target is located. With "hot spots" eliminated, the unit's detection field is uniform throughout the archway and false alarms are minimized.

Microprocessor Controlled

State of the art microprocessors ensure sensitivity and flexibility of programming with a maximum of 200 distinct sensitivity levels in each program.

Audible and Visual Alarms

Audible alarm with 3 distinct tones indicating target on the left, right or center of the archway; two LED bar graphs related to the red Alarm Lights that report detectable metal on either side of the unit or centered within it.

Detection Field

Unique coil design of the Garrett MT 5500 offers multidimensional detection field with uniformity both horizontally and vertically. This design, plus a choice of three levels of ankle level boost, eliminates traditional hot spots and weak signals.
