

# FEMA Releases COVID-19 Healthcare Resource Roadmap (Version 2.0)

---

FEMA recently updated the COVID-19 Healthcare Resource Roadmap to assist state, local, tribal and territorial (SLTT) partners with the unprecedented challenges associated with healthcare support during the COVID-19 pandemic.

Specifically, in addition to the CARES Act, Version 2.0 includes resources that were identified in the Consolidated Appropriations Act and American Rescue Plan Act. Additionally, FEMA released the *COVID-19 Healthcare Funding Decision Framework*, which is intended to assist stakeholders who are navigating healthcare challenges attributable to the COVID-19 pandemic, including the identification, sequencing, administration, and management of funding resources. This document was developed in parallel with and in support of the COVID-19 Healthcare Resource Roadmap (Version 2.0).

This Roadmap is part of a series that FEMA developed last year to assist SLTT partners in identifying potential sources of funding and other resources to help them with COVID-19 pandemic recovery. The five Roadmaps (food and nutrition, housing, healthcare, education, and economic recovery) were developed in partnership with nearly thirty federal interagency partners, including the U.S. Department of Health and Human Services, U.S. Department of Housing and Urban Development and U.S. Department of Commerce. Each Roadmap identifies potential solutions to address specific challenge areas and describes how supplemental and certain annually appropriated funds can be used to implement recovery solutions.

All of the COVID-19 Resource Roadmaps can be found on [Resource Roadmaps | FEMA.gov](#).
