

As Built Drawings

I have located the architects that drew the plans for the original building currently occupied by "The Oaks / Right of Passage" dated November of 1967. At that time the building was referred to as "Reception Center / Training School for Girls".

The architectural firm is Shiver-Megert & Associates, LLP 806-372-5662

They still have the drawings on file. If Brown County would want a copy of the drawings the cost will be \$700.00

This would be a scanned in, high resolution, PDF copy (digital).

Being that this is a large facility owned by the County which apparently will be needing ongoing repair I thought it would be a worthwhile consideration. Currently we could use the plumbing drawings to help deal with the current leaks.
